

Ion·this[®] Inc.

CONTRACT MANUFACTURING CABLE ASSEMBLIES & WIRING HARNESSSES

Ion·this manufactures a wide range of cable assemblies and wiring harnesses to your drawing, specification, sample or just an idea. We work equally with small companies requiring smaller quantities to large corporations with large production runs. Ion·this is a USA owned and operated company in Houston Texas with offices in Shenzhen and Shanghai China that specializes in Designing and Contract Manufacturing Electronic Components and utilizing the cost savings in manufacturing components or finished products and assemblies in China

Ionthis has the experience necessary to manufacture simple point-to-point assemblies to very complex multi-cable assemblies to satisfy all of your custom cable manufacturing requirements. Our engineering will review your design requirements and if needed present options on how to reduce your cost. We will then take your requirements and compile a complete data package including all the required specifications, QA documentation and manufacturing drawings for your approval. After your approval we will submit a production sample for your inspection. Once the sample of the cable assemblies or wiring harnesses is approved, we will manufacture the products to your standards and deliver the finished product to your door.

Cable Assemblies and Wiring Harnesses we manufacture but are not limited to:

- Cable Assemblies
- Wire Harnesses
- Ribbon Cable Assemblies
- Over Mold Cable Assemblies
- RF Cable assemblies
- Simple Jumpers
- Power Cords
- Fiber Optics patch Cords & Splitters
- Electronic and Industrial Applications
- UL, ISO 9001 & ISO/TS 16949

We take out the RISK, NOT the COST SAVINGS, in manufacturing in China.

Ion·this[®] Inc.

CONTRACT MANUFACTURING ♦ CAPABILITIES

Die Cast

Sheet Metal Fabrication

Extrusions

Plastics

Cable Assemblies & Wiring Harnesses

PCBs & Power Supplies

Ion·this is a USA owned and operated company in Houston Texas USA with offices in Shenzhen and Shanghai China that specializes in designing and contract manufacturing electronic component products and utilizing the cost savings in manufacturing components or finished products and assemblies in China

Whether you are an entrepreneur or a company that has a new idea, design, or are exploring cost-saving options, Ionthis strives to provide the highest quality production and the lowest possible cost. We will take your final or preliminary design, sample or just an idea, we will do the rest and provide complete Contract Manufacturing Resources (Engineer/Design/Inspect/Logistics) and give a price to your door to meet your unique needs and YOUR standards.

Our team is able to provide our customers with a complete value analysis incorporating our knowledge of manufacturing processes within China. Ionthis focuses on more than one small aspect of your application. Our extensive experience includes fabrication, machining, tooling, surface treatments, assembly, box builds packaging and logistics allowing our experienced engineering team to analyze the entire manufacturing cycle and identify efficiencies and opportunities for cost savings. We will suggest design enhancements utilizing our vast experience to improve quality while reducing cost.

We have over 25 years of experience within China and deliver to YOUR door a product with a guaranteed price and quality

We take out the RISK, NOT the COST SAVINGS, in manufacturing in China.
