

CONTRACT MANUFACTURING POWER SUPPLIES & PCBs

Ion·this manufactures a wide range of power supplies and PCBs to your drawing, specification, sample or just an idea. We work equally with small companies requiring smaller quantities to large corporations with large production runs.

Ion·this is a USA owned and operated company in Houston Texas with offices in Shenzhen and Shanghai China that specializes in Designing and Contract Manufacturing Electronic Components and utilizing the cost savings in manufacturing components or finished products and assemblies in China

Power Supplies

Ionthis has the experience necessary to manufacture simple internal DC/AC power supplies, HFC power supplies to larger non-standby and UPS power supplies to satisfy all of your custom cable manufacturing requirements including cabling and housing requirements and UL, CSA or other requirements as needed.

Our engineering will review your design requirements and if needed present options on how to reduce your cost. We will then take your requirements and compile a complete specifications and manufacturing drawings for your approval. After your approval we will submit a prototype sample for your inspection and testing. Once the sample is approved, we will manufacture the products to your standards and deliver the finished product to your door.

PCB Assemblies

Ionthis has the experience, flexibility and resources to assist you in prototype to full-scale production and is capable of working from your supplied parts kits or providing a full turn-key assembly, including functional and in-circuit testing.

We work with ISO 9000 standard factories and provide our customers with cost-effective printed circuit board assembly services. We excel in a variety of volume requirements from low-volume complex, custom products to high-volume standard products.

Our Service includes but is not limited to:

- Electronics Manufacturing Service
- OEM Assembly
- Surface Mounted Technology (SMT) Assembly
- Manual Solder and System Assembly
- Full Testing Solutions

We take out the RISK, NOT the COST SAVINGS, in manufacturing in China.

CONTRACT MANUFACTURING ♦ CAPABILITIES

Die Cast

Sheet Metal Fabrication

Extrusions

Plastics

Cable Assemblies & Wiring Harnesses

PCBs & Power Supplies

Ion·this is a USA owned and operated company in Houston Texas USA with offices in Shenzhen and Shanghai China that specializes in designing and contract manufacturing electronic component products and utilizing the cost savings in manufacturing components or finished products and assemblies in China

Whether you are an entrepreneur or a company that has a new idea, design, or are exploring cost-saving options, Ionthis strives to provide the highest quality production and the lowest possible cost. We will take your final or preliminary design, sample or just an idea, we will do the rest and provide complete Contract Manufacturing Resources (Engineer/Design/Inspect/Logistics) and give a price to your door to meet your unique needs and YOUR standards.

Our team is able to provide our customers with a complete value analysis incorporating our knowledge of manufacturing processes within China. Ionthis focuses on more than one small aspect of your application. Our extensive experience includes fabrication, machining, tooling, surface treatments, assembly, box builds packaging and logistics allowing our experienced engineering team to analyze the entire manufacturing cycle and identify efficiencies and opportunities for cost savings. We will suggest design enhancements utilizing our vast experience to improve quality while reducing cost.

We have over 25 years of experience within China and deliver to YOUR door a product with a guaranteed price and quality

We take out the RISK, NOT the COST SAVINGS, in manufacturing in China.
